1 Title

In addition, the EIA has a new requirement for each of the three leading power generation operators in the US to report on their performance on the US National Information System (NIS) for the period between December 2015 and December 2016. That is, NIS will be required to identify and collect the total number of power generation and generation-intensive activities and to report on the total number of hours of operation of each of the three power generation operators.
