A total of 6,550 patients with major depression were analyzed by using the two-tailed  
Student t test .

### RESULTS

Table 4.

Anxiety/depression among patients with major depression and its prognostic value  
(n = 5).

Significance of Metastatic Association between Depression and Metastatic Association  
(n = 5).

Significance of Metastatic Association between Depression and Metastatic Association  
(n = 5).

Significance of Metastatic Association between Depression and Metastatic Association  
(n = 5).

Significance of Metastatic Association between Depression and Metastatic Association
