I spent the next three weeks working on the final version of the original design. I was able to put together a working user interface with a few minor changes: - A new background was added for the user interface. This was done in parallel with the initial design. - The new background was added to the user interface. This was done in parallel with the initial design. - The background was added to the user interface. This was done in parallel with the initial design. - The background was added to the user interface. This was done in parallel with the initial design. - The background was added to the user interface. This was done in parallel with the initial design. - The background was added to the user interface. This was done in parallel with the initial design.

- The background was added to the user interface. This was done in parallel with the initial design.
