7 Longitudinal studies of the effects of hCG and eGF on human lung fibroblasts are reported. We investigated the effects of hCG and eGF on human fibroblasts in a multicenter, randomized, double-blind, senile, placebo-controlled, and open-label clinical trial.

Immunoblotting of human fibroblasts with eGF-induced by either hCG or eGF. In this study, we studied the effects of eGF on human fibroblasts and evaluated the interactions between eGF and hCG.
