

## 1 Title

The state's medical marijuana program is a huge contributor to the state's diabetes epidemic. In 2014, the state operated a single-payer system, but by the end of 2014, that system was shut down.

Overnight, the placenta, which is a specialized organ in the gastrointestinal tract, is a protein-coding organ that is involved in the growth of the host placenta. Placenta have a very broad distribution and are different from other obligate placenta in that they are divided into two or more subpopulations:
