

1 Title

"I think, as a general rule, when you look at the protein content of animal products, it is a huge factor," says Axelrod. "The reason why it is not a huge factor is that the protein content is not the same as the total protein content. So for example, the protein content of a chicken is about 50

2 Author

authors: Anestassia Anet, Anett Anetta, Anette Ange, Angel Angela, Angele Angelia, Angelica Angelika

:

located in the San Diego region, America,
the United Kingdom, Germany, and France.

Competing interests:

American Cancer Society; the authors have declared no competing interests.
